Service Provider

CheapShark API helps to find the best deals on PC games. It watches the prices at stores like Steam, Epic Games, and Ubisoft so people can easily compare them and save money.

Purpose: To make it easy to search for PC games, check detailed game info, and discover the cheapest deals by comparing prices across multiple digital stores.

Base URL: GET <https://www.cheapshark.com>

Free Tier: Public Access - No API Key Required

API Capabilities

`/games?id=[ID]`

Game Details; Provides detailed information for a specific game.

`/stores`

Stores List; Returns meta-data for all stores (Steam, EpicGames, Ubisoft... etc) including icons and banners.

API Capabilities

`/deals`

Get Main Deals; Returns a list of the latest and best discounts. Includes current price, retail price, and savings percentage.

`/games?title=[Name]`

Search Names; Finds games matching a specific title. Used for search bar functionality within the application.

Restful Architecture

Statelessness

Each request contains all information needed to process it.

Uniform Interface

Resources are identified via clean, logical URLs.

JSON Format

Lightweight and standardized data exchange between server and client.

Client-Server

Decoupled frontend logic from backend data hosting.

API Request Structure

<https://www.cheapshark.com/api/1.0/games?title=FIFA>

Protocol

Base URL

HTTP Methods

Methods	Action	Usage
GET	Retrieve Data	Used
POST	Create Data	Not Used
PUT	Replace Data	Not Used
PATCH	Modify Data Partially	Not Used
DELETE	Remove Data	Not Used

Why Only GET Method ?

* **Read-Only Access:** Both APIs are used only to view data.

* **No Data Changes:** The app fetches data without editing the database.

* **Safe for Public Use:** Ideal for browsing and searching public information.

Postman Requests and Responses

The screenshot displays the Postman interface for a GET request to `https://www.cheapshark.com/api/1.0/deals`. The request is in the "raw" format. The response is a 200 OK status, received in 444 ms with a body size of 9.11 KB. The response body is a JSON object containing details about a game deal.

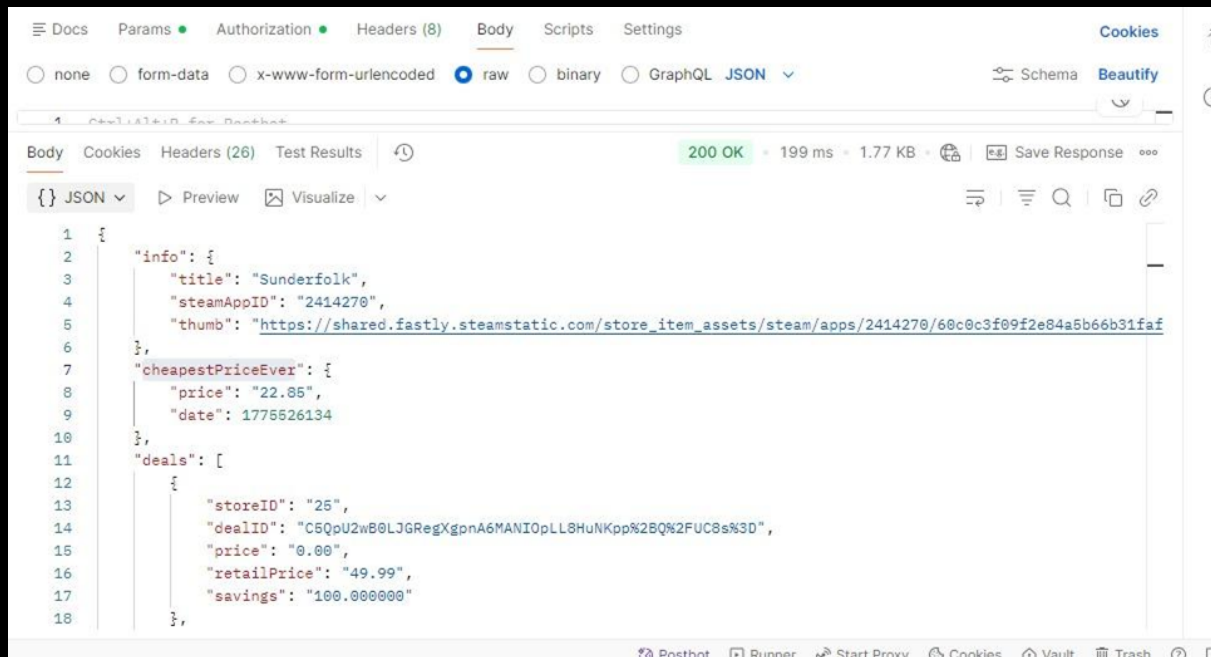

Request:

- Method: GET
- URL: `https://www.cheapshark.com/api/1.0/deals`

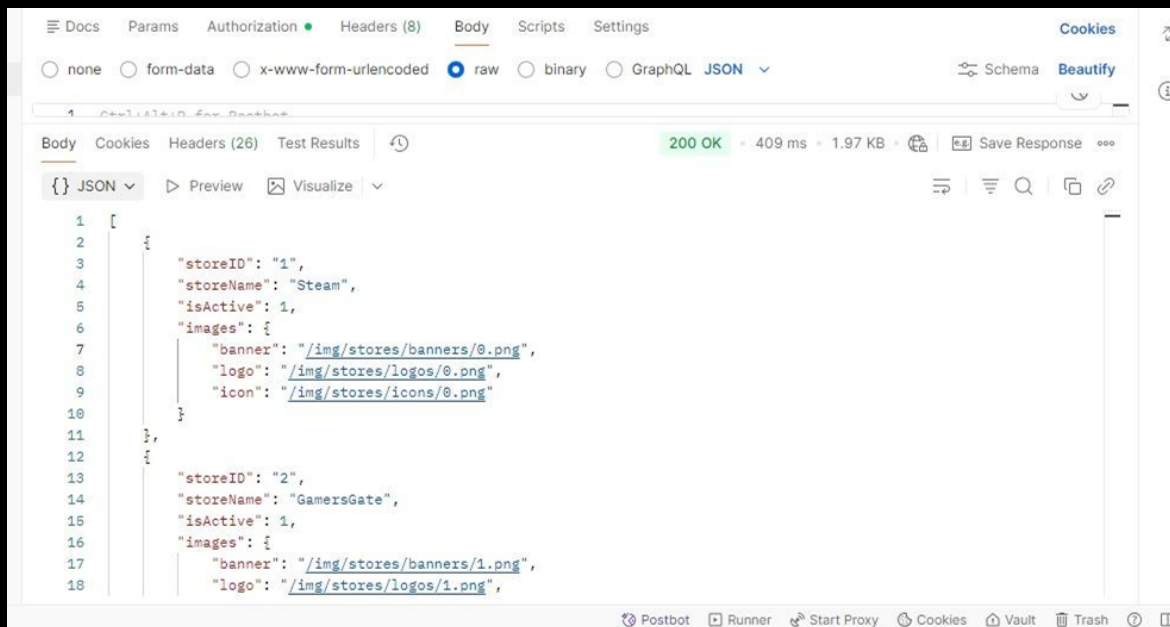

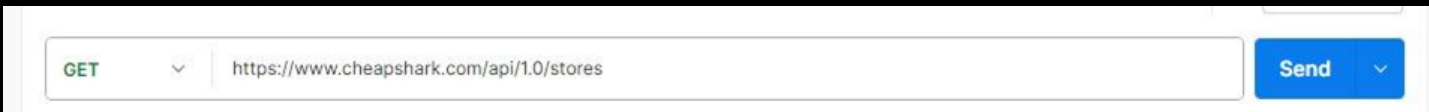

Response:
